

TEXT:

The Japanese have dangerously become addicted to overwork some die of it-the most dangerous case is that of a 26 years old employee of an electronics firm who suffers from an extreme case of techno-dependency. This means that he is convinced that he cannot communicate with people without a computer, he cannot live without a computer. He spends all his working hours either working with computers in his office, or tinkering with them in his gadget-crammed room in his parents' home. There is nothing else in this man's life. He works on Saturdays and Sunday and is always at desk on bank holidays. The patient believes there is no point talking to humans because they are irrational and emotional. He communicates with his office colleagues through computerized messages and is under such a degree of a tranquilizer. He has computer has become a kind of a tranquilizer. He has friends but he thinks he is having a relationship with his computer.
