## THE TEXT

1. School was all but impossible for Sparky. He failed every subject in the eighth grade. He **flunked** physics, Latin, algebra and English, getting a grade of zero. His record in sports wasn't any better. He lost the only important match of the season. Sparky was a loser. He, his classmates ... everyone knew it. So he learned to live with it. He made up his mind early that if things were meant to work out, they would.
2. One thing was important to Sparky, however, drawing. He was proud of his artwork. No one else appreciated it. But that didn't seem to matter to him. In his senior year of high school, he submitted some cartoons to the yearbook. The editors refused the concept. Despite the **brush-off**, Sparky was convinced of his ability. He even decided to become an artist. So, after completing high school, Sparky wrote to Walt Disney Studios. They asked for samples of his artwork. Despite careful preparation, it too was refused. One more confirmation that he was a loser. But Sparky didn't give up. Instead, he decided to tell his own life story in cartoons. The main character would be a little boy who symbolized the perpetual loser and chronic underachiever.
3. People readily identified with this "lovable loser." He reminded people of the painful moments of their own past and their shared humanity. The character soon became famous worldwide: "Charlie Brown." Sparky, the boy whose many failures never kept him from trying, whose work was rejected again and again.. is the highly successful cartoonist Charles Shultz.

Japan is taking steps to fight social isolation by employing robots in as many aspects of life as possible. After introducing autonomous robots in (**various / variety / vary**) roles in a hospital and a number of nursing homes and schools, a café in Tokyo will soon open with (**robotic / robots / robotics**) waiters controlled remotely by people with physical (**defaults / disabilities / failures**) who wouldn't be able to work otherwise. The pilot run of the café is (**set up / found / scheduled**) for weekdays from November 7<sup>th</sup>. The (**creation / created / creator**) of the robots, Ory Laboratory, plans to open another permanent café closer to the 2020 Tokyo Olympics and Paralympics. Another area where robots are increasingly (**involved / consisted / concerned**) in Japan is elderly care. A variety of caregiving institutions have been employing robots that help their patients move, but also keep them company when there are no humans around.
