I) READING COMPREHENSION

A- THE TEXT

1-“What is an education?” asks Sue Cowley, a parent and teacher, in her new book. “Is it about going to school every day, wearing the correct uniform, working hard in lessons and completing your homework? Or could **it** be something that can happen out in the world as well as in a classroom?” Sue Cowley has spent a lifetime in education. Then, three years ago, she took her two children out of school, packed the family car and set off on a journey across Europe and China.

2-The journey was planned around the children’s interests. The result was a thrilling six-month adventure documented in her book, *Road School*. “The way the world works can teach children a lot. It’s a different type of learning,” Cowley writes in the opening pages of the book.

3-Towards the end of her book, she proposes a program for parents wanting to educate their children on the move. For English, it suggests writing letters home. For maths, children may work out currencies, distances travelled and prices on menus. For Physical Education, they can do some sightseeing on foot or bike. The other big advantage was the way in which travelling increased the children’s ability **to cope with** the unexpected. “It was things like that where the depth of understanding came through,” says Cowley.

4-Since their return, Alvie and Edite have stepped back into **their** old classes and Sue has nothing but praise for the schools they attend. The children may be happy to be home, but Sue has found it harder to adapt. “The minute I got back, I was thinking where we can go next. The danger is that **you get itchy feet**,” she says.
